*Followed by Lake George Conservation
Club monthly business meeting.*

WHERE?

The Refuge in Oak Grove

21250 Yellow Pine Street NW

The purpose of the LGID is to preserve and protect Lake George ("Lake George" or the "Lake") and its abutting wetlands and to increase and enhance the use and enjoyment of the Lake for all. The LGID has been established by the City of Oak Grove to preserve the natural character of Lake George and the surrounding shoreline and environment where feasible and practical; improve the quality of water in the Lake and to assure protection of the Lake from

- detrimental effects of human activities.
- the introduction of damaging aquatic life and,
- certain other natural processes that may adversely impact the Lake.

To achieve these goals the LGID works in close collaboration with the Minnesota Department of Natural Resources, Anoka County Conservation District and Anoka County Park Department.
